Table of Contents

1. Introduction

The purpose of this document is to provide the specifications and guidelines for the Import and Export functionality of the DARMHA (Data Assessment Registry Mental Health & Addiction) system. The Import functionality provides a method for DARMHA users to submit data to the DARMHA system through the use of comma delimited text files containing predefined layout information. The Export functionality provides a method for DARMHA users to export data from DARMHA.

1.1 Scope

This document provides information about DARMHA Import and Export Functionality. This document is in nature and covers the following topics:

- Importing of Data
    - o Datasets that are requested from the providers and their respective data elements, both required and optional.
    - o File layouts needed for the different datasets that will be imported into the DARMHA.
    - o Error Reports with error definitions and the effects on the imports.

- Exporting of Data
    - o Data set available with each export

Topics that are not covered in this document include:

- How to set up your application to utilize the DARMHA Import or Export functionality

Export Functionality

The DARMHA system provides the functionality to extract data out of the system in real-time without supplying a formal request to DMHA. This functionality will facilitate the data integration efforts to the provider's Electronic Medical Records or other Case Management systems.

1.2 Export Types

Data can be exported as text (comma delimited) or XML. When exporting to a text file, the first line lists all of the column names. Currently there are twelve different export types available in DARMHA. For each export type, except Assessment Tools, there are four options:
- By Date – Supply a Date Range. This will export all the data between the date(s) entered.
- All new records not previously exported
- Everything in Open Episodes
- Everything: It will export all the data

Export Type	Description
Consumer Demographics Export	This is a data extract of the consumer demographic information.
Assessment/ Results Export	This is a data extract of the consumer assessment information by either Summary Assessment Info (resulting algorithm recommendations) or by Detail Assessment Info (the corresponding answers to each of the items/questions).
Episode Information Export	This is a data extract of consumer Episode information.
Encounter Information Export	This is a data extract of consumer Encounter information.
NOMS Data Export	This is a data extract of consumer NOMS information.
Diagnosis/Agreement Type Data Export	This is a data extract of Diagnosis/Agreement Type information.
EBP Data Export	This is a data extract of EBP information.
Assessment Tools	This provides all assessment questions and answers.

1.3 Export Access

The export functionality is available only to DARMHA users that have been authorized by their organization to have access to this functionality. Users that have this functionality activated will have available a menu named Import Export and two submenus (Export and Export log). On the Export submenu, users will be able to select the data needed to be exported as well as the format the data will be exported. The data will then be available on the Export Log page. For more information details regarding field options, see the import section.

2. Import Functionality

The goal of the Import functionality in DARMHA is to provide users with a method to submit their data to the DARMHA system by utilizing comma-delimited text files. Unlike in the past, the user can now submit data without choosing layout type.

Import Layout Name	Record Identifier	Description
Consumer	C	Insert/Update Consumer demographic information.
Assessment – CANS 0-5	Z	Insert CANS 0-5 Assessment information.
Assessment – CANS 5-17	F	Insert CANS 5-17 Assessment information.
Assessment – ANSA	A	Insert ANSA Assessment information.
Episode	E	Insert/Update Consumer Episode information.
Close Episode	L	Close Episode Information.
Encounter	S	Insert New Consumer Encounter.
Encounter	U	Edit Existing Consumer Encounter.
Delete Encounter	X	Delete Existing Consumer Encounter.
NOMS	N	Insert Consumer NOMS information.
Diagnosis & Agreement Type	D	Insert Diagnosis & Agreement Type information.

2.1   Import Access and Requirements

The Import functionality of DARMHA available to DMHA contracted providers allows them to import data into the DARMHA system. The DARMHA Import functionality validates and processes data at the point of delivery to the system.

To utilize the Import Functionality, DMHA Contracted Providers are required to supply through the DARMHA Help Desk (darmha@fssa.in.gov) at least one user to be assigned a DARMHA login for data submission and retrieval. More accounts may be created at the provider's discretion.

Providers are required submit test data to the DARMHA Quality Assurance (QA) environment (https://dmhaqa.fssa.in.gov/DARMHAQA). This allows providers the opportunity to review and refine their process without the risk of corrupting live data. For data security reasons, all data submitted to the DARMHA QA environment must be test data only. Before being given access to import in DARMHA Production, providers are

required to perform a minimum of two (2) error-free submissions of each import area (Consumer, Episode, Assessment, Diagnosis/Agreement Type, Encounter, and NOMS) they intend to use to submit data. Once the providers have successfully performed their testing in the DARMHA QA environment, the provider can request to the DARMHA Help Desk their production access to the Import functionality. After approval, access will be granted to the assigned users for production data submission.

The following requirements apply for DARMHA Import.

- Only comma-delimited text files are accepted. Do not include a header row in the import file. The field names displayed in the import layouts are for reference only and should not be included in the text file.
- If records are rejected, after correcting the error, resubmit only the records with errors.
- Optional fields that contain no data must have a placeholder in the comma-separated file in order for the application to parse the data successfully.
- The Consumer Import needs to be done first followed by the "E" Episode Import. The order of the rest of the imports is not important.
- String Fields can include commas if field is encapsulated with double quotes.
- Required Identifiers
  - Providers need to create a unique identifier for consumers called the "**Internal ID**." **Internal IDs are required in every import.**
  - Providers need to create an identifier for episodes called the "**Internal Episode Code**." This is the provider's identifier for a specific episode in a consumer's history and allows the provider to edit both current and past episodes. The Internal Episode Code must be unique for the specific consumer, but does not have to be unique across the provider. This means that Consumer A can have an Internal Episode Code of "1" and Consumer B can have an Internal Episode Code of "1", but Consumer A cannot have two Internal Episode Codes of "1." **Internal Episode Code's are required in every import, except the Consumer Import.**
  - Providers need to create an identifier for encounters/services called "**Internal Service ID**" if they want to edit or delete encounters through Import. This ID identifies a specific encounter/service for future edits or deletion. The Internal Service ID must be unique for the specific consumer, but does not have to be unique across the provider. This means that Consumer A can have an Internal Service ID of "123" and Consumer B can have an Internal Service ID of "123", but Consumer A cannot have two Internal Service IDs of "123."
  - Providers can choose whether they want to create an "**Internal Assessment ID**." This is not a required identifier.

2.2 Consumer Import Layout

Field #	Field Name	Data Type	Length	Comments/Description	Required
1	Record Identifier	Character	1	This flag determines data contained within the remainder of the row and how the row should be formed. **Value = "C"**	Yes
2	Internal ID	String	20	The provider's internal consumer identifier used at the provider's practice in their internal systems	Yes
3	Unique ID	String	16	If consumers were included in the previous state database (CSDS), please supply this identifier for tracking purposes and do not change it.	No
4	Last Name	String	30	Consumer's Last Name	Yes
5	First Name	String	25	Consumer's First Name	Yes
6 determi...	Gender	Character	1	M = Male F = Female	Yes
7	Date Of Birth	Date		Consumer's Birth Date (MM/DD/YYYY)	Yes
8	SSN	String	11	Consumer's Social Security Number (999-99-9999)	No
9	Ethnicity	Integer		Consumer's ethnic status. 1 = Puerto Rican 2 = Mexican 3 = Cuban 4 = Other Hispanic/Latino 5 = Not Hispanic/Latino 6 = Latino, Unknown Origin	Yes
10	Zip Code	String	10	Consumer's Zip Code (99999 or 99999-9999)	Yes
11	Middle Name	String	25	Consumer's Middle Name	No
12	Mother's Maiden Name	String	30	Consumer's Mother's Maiden Name	No
At least one of the Races listed below must be "Yes".					
13	American Indian	Integer		0 = No, 1 = Yes	Yes
14	Asian	Integer		0 = No, 1 = Yes	Yes
15	African American	Integer		0 = No, 1 = Yes	Yes
16	Caucasian	Integer		0 = No, 1 = Yes	Yes
17	Hawaiian/Pacific Islander	Integer		0 = No, 1 = Yes	Yes
18	Other Single Race	Integer		0 = No, 1 = Yes	Yes; can only be used when none of the other race categories apply
19	Suffix	Integer		-2 = None 1 = I (First) 2 = II (Second) 3 = III (Third) 4 = IV (Fourth) 5 = V (Fifth) 10 = Jr. 11 = Sr.	No
20	Primary Language	Integer		See Section 6	Yes

21	Not English Language	Integer		0 = No, 1 = Yes, -3 = Not applicable. Not applicable (-3) will only be available for consumer records that are being updated and when English is not the primary language.	Yes
22	Medicaid/HIP ID	Integer	12	Consumer's Medicaid ID, must be 12 digits starting with 10 and ending with 99 or 12 digits starting with "6".	Yes, if Active Medicaid/HIP
23	Dept of Correction ID	String	6	Optional for Recovery Works	No
24	Recovery Works	Integer		Field used for Recovery Works- required for program (0 = No, 1 = Yes)	No

2.3 Episode Data

The Episode Data contains all of the detail data that determine the consumer's episode of care. The file is a variable length, variable field, comma-delimited data set. Each row of data will be tagged with a leading attribute, the Record Identifier that indicates which record set the row belongs to. Providers can submit all Episode data in the same file or in separate files.

Note: It is easier to troubleshoot import issues if one type of Episode data is sent at a time. For example, importing only NOMS data in a file.

Note: The Episode Data will be processed in the order received within the file. Detail data may not be submitted for areas such as the Assessment, Encounter, NOMS or Diagnosis/Agreement Type data sets without a previously submitted Episode ("E" Import) for the consumer.

Field #	Field Name	Data Type	Length	Comments/Description	Required
1	Record Identifier	Character	1	This flag determines data contained within the remainder of the row and how the row should be formed. **Value = "E"**	Yes
2	Internal ID	String	20	The provider's internal consumer identifier used at the provider's practice in their internal systems.	Yes
3	Internal Episode Code	String	25	The provider's internal episode identifier for the episode of care for the specified consumer.	Yes
4	Episode Start Date	Date		Date the consumer's episode of care began (MM/DD/YYYY).	Yes, on episode creation only, cannot be edited
5	Episode End Date	Date		Date the consumer's episode of care ended (MM/DD/YYYY).	No, except when closing an episode of care

6	Active Medicaid/HIP	Integer		Does the consumer have Medicaid or HIP that is active? 0 = No, 1 = Yes *If Yes, Medicaid ID in Consumer data is required.*	Yes
7	Marital Status	Integer		1 = Single 2 = Married/Living together 3 = Widowed 4 = Divorced 5 = Married separated	Yes
8	County of Residence ID	Integer		Numerical county identifier.	Yes
9	Food Stamps	Integer		Is the consumer currently receiving Food Stamps? 0 = No 1 = Yes	Yes
10	Source of Referral	Integer		1 = Individual/Self 2 = Alcohol/Drug Abuse Care Provider 3 = Health Care, Other 4 = School (Educational) 5 = Employer/Employee Assistance Program 6 = Other Community Referral 7 = Court/Criminal Justice 8 = Referral from Child Welfare/Department of Child Services (DCS)	Yes
11	Legal Basis For Referral	Integer		1 = State/Federal Court 2 = Other Court (not State or Federal) 3 = Probation/Parole 4 = Other Recognized Legal Entity (E.G. local law enforcement agency, corrections agency, youth services, review board/agency) 5 = Diversionary Program (e.g., TASC) 6 = Prison 7 = DUI/DWI 8 = Other	Yes, if Source of Referral = 7 otherwise list as -3
12	Served	Integer		The consumer served in one of the branches of the military, including the National Guard. 0 = No 1 = Yes -3 = Not Applicable	Yes, if consumer is under 18 mark as -3 (Not Applicable).
13	Veteran	Integer		The consumer is considered to be a veteran. 0 = No 1 = Yes -3 = Not Applicable	Yes, if Served is 0 then list 0. If served is -3 then list as -3.
14	Deployed	Integer		The consumer has been deployed in the past. 0 = No 1 = Yes -3 = Not Applicable	Yes, if Served is 0 then list 0. If served is -3 then list as -3.
15	Combat	Integer		The consumer served in combat. 0 = No 1 = Yes -3 = Not Applicable	Yes, if Served is 0 then list 0. If served is -3 then list as -3.

16	Family in Military	Integer		A member of the consumer's immediate family served in the military. 0 = No 1 = Yes	Yes
17	Consumer Disability	Integer		-2 = None 2 = Blind 3 = Intellectual Disability/Developmentally Disabled 4 = Deaf 5 = Mute 6 = Non-ambulatory 7 = Other Physical/Medical 8 = Neurological Impairment 9 = Learning or reading disabilities 11 = Traumatic Brain Injury 12 = Hard of Hearing	Yes
18	TANF	Integer		Is the consumer enrolled in TANF? 0 = No 1 = Yes	Yes
19	Consumer Health Insurance	Integer		-2 = None 1 = Private Insurance 4 = Medicaid 5 = Medicare 6 = Other 10 = HIP 11 = TRI Care 12 = Medicaid and Medicare	Yes
20	Insurance History Date	Date		The first Insurance History Date will default to the episode start date.	Yes
21	Family Size	Integer		Number of individuals supported by the adjusted family income Maximum value is 30.	Yes, Must be at least one
22	Adjusted Family Income	Integer		Annual family income - Maximum of six digits – Cannot be a negative number	Yes
23	Episode Status	Integer		1 = Consumer in treatment 3 = Service Completed* 4 = Consumer Dropped/Opted out* 5 = Death* 6 = Moved out of Service area* 7 = Incarcerated (treatment has stopped)* 8 = Entered Nursing Home (treatment has stopped)* 9 = Administrative Discharge*	Yes * *Indicates an Episode End Date is required.*
24	Prior SA Episodes	Integer		The number of prior Substance Abuse Episodes Value should be 0 - 30	Yes
25	Dependent Children	Integer		Does the consumer have dependent children? 0 = No 1 = Yes	Yes
26	DSC Status	Integer		0 = Not a DMHA Supported Consumer – **This is the default.** 1 = DMHA Supported Consumer 2 = DMHA Supported Consumer - Medication Only **Note:** Changing this status at episode close is not allowed.	Yes

| 27 | DSC Start Date | Date | | For new episodes, this field will be automatically populated with the episode start date. When the status is changed, a date will be required. *No future dates, no date before the Episode Start Date and no date before a previous DMHA Supported Consumer Status Start Date are allowed.* | No, except when the HAP Status is changed, a date will be required. |

Conditions for which the above record generates an error:

- No consumer is found with the corresponding Internal ID
- There is no corresponding Internal Episode Code for the consumer.
- Required fields are missing.
- Date fields are not formatted correctly.
- Non-required fields require an empty field place holder (, ,)
- Number of fields does not equal what is anticipated for an Episode Record (27)
- The Internal Episode Code is for a closed episode of care that is older than 180 days.

2.4 Close Episode Import Layout

Field #	Field Name	Data Type	Length	Comments/Description	Required
1	Record Identifier	Character	1	This flag determines data contained within the remainder of the row and how the row should be formed. **Value = "L"**	Yes
2	Internal ID	String	20	The provider's internal consumer identifier used at the provider's practice in their internal systems.	Yes
3	Internal Episode Code	String	25	The provider's internal episode identifier for the episode of care for the specified consumer.	Yes
4	Episode End Date	Date		Date the consumer's episode of care ended (MM/DD/YYYY).	Yes
5	Episode Status	Integer		3 = Service Completed 4 = Consumer Dropped/Opted out 5 = Death 6 = Moved out of Service area 7 = Incarcerated (treatment has stopped) 8 = Entered Nursing Home (treatment has stopped) 9 = Administrative Discharge	Yes

17	Peer Support	Integer		0 = No 1 = Yes	Yes
18	Reporting Field 1	Integer	2	Data to link with assessment. *(Leave blank if not used)*	No
19	Reporting Field 2	Integer	2	Data to link with assessment. *(Leave blank if not used)*	No
20	Answer IDs	Integer (Array)		The ID provided by DARMHA that differentiates assessment tool answers. *(Values should be comma separated)*	Yes

Assessment Import Layout Requirements

- The "Internal ID" value must match an existing consumer submitted prior to the submission of the assessment.
- The "Certified CANS/ANSA Professional ID" value (also called "Clinician ID") must be registered with a certified individual within the DARMHA system prior to the submission of the assessment. The information is currently supplied to the DARMHA by contacting the DARMHA support center and registering the users.
- The "Assessment Date" must be prior to the expiration date of the CANS/ANSA clinician's certification. Future dates are not allowed.
- The "Answer IDs" field must coincide with the IDs supplied by DMHA and the DARMHA system for the CANS/ANSA tools. This ensures consistent data and valid algorithm recommendations.
- The "Internal Episode Code" specifies which episode of care to attach this assessment to.

When generating a crosswalk or integrating the CANS/ANSA tools into your application the following items need to be considered:

- All answers submitted must correspond to the same assessment tool. Several tools have similar questions/modules and answers; however, each answer has its own unique identifier. Substitution of an "Answer ID" from another tool/module/question results in the rejection of the assessment.
- All assessments must be submitted as complete assessments. No modifications of an assessment can be made after it is submitted via the import process. If an assessment is partially complete, enter it in through the web interface and return to it later to complete it.
- All assessments have core modules and possibly an extension module triggered by answers to specific questions within a core module. When an assessment is submitted, all core modules and extension

modules are required to have a valid answer or else the import process rejects the assessment. Extension modules are evaluated based upon the answers supplied in the respective core modules.
- Some modules currently have "Not Applicable" available as an answer option. In these modules, the "NA" value is required for each question within the module for it to apply to the whole module. Failure to do so will result in an incomplete assessment. Incomplete assessments are rejected.

2.6 Encounter Import Layout

Field #	Field Name	Data Type	Length	Comments/Description	Required
1	Record Identifier	Character	1	This flag determines data contained within the remainder of the row and how the row should be formed. **Value = "S"**	Yes
2	Internal ID	String	20	The provider's internal consumer identifier used at the provider's practice in their internal systems.	Yes
3	Internal Episode Code	String	25	The provider's internal episode identifier for the episode of care for the specified consumer.	Yes
4	Service Date	Date		Date the service was provided (MM/DD/YYYY).	Yes
5	Location ID	String	7 (max)	DMHA provides this ID for each of your facilities. * Use your DMHA Provider ID for Location Types (2-5)	Yes
6	Location Type	Integer		1 = At facility 2 = School-based 3 = Home-based 4 = Out in the community 5 = At a Sub-contractor	Yes
7	Procedure Code	String	6	Current Procedural Terminology Codes (CPT) or Health Care Common Procedure System Codes (HCPCS).	Yes
8	Units	Integer		The number of units of the procedure supplied above, must be greater than 0 - no partial units accepted – Maximum value is 999.	Yes
9	Common Value	Integer		The customary or typical value of this service for a **single unit** – Must be greater than zero; no decimals - no fractions Maximum value is 99,999.	Yes
10	Level of Clinician	Integer		1 = Psychiatrist, Board Eligible or Certified 4 = Other MD or DO 7 = PhD Psychologist, HSPP 8 = PhD Psychologist, Non HSPP 10 = PhD or Masters in Social Work, Nursing, Counseling, Marriage and Family Therapy, Psychology, LCSW, LMHC or LMFT 13 = Other Masters or Other PhD 16 = Certified Addiction Counselor 19 = RNs 22 = Bachelors 25 = Less Than Bachelors 28 = Facility (Residential Care) Staff	Yes

11	Internal Service ID	String	25	The providers internal identifier for this rendered service.	Required data field in order to edit or delete an encounter through import
12	Main Service Setting Type	String	2	Describes the main service setting a consumer is in on the day of the encounter. Each time an encounter is sent for particular day, you need to send in the main service setting for that day. You should use the highest appropriate fed code. See Section 7.	Yes, if Agreement type is 3 (CA)

Conditions for which the above record generates an error:
- No consumer is found with the corresponding Internal ID
- No episode is found with the specified Internal Episode Code
- The Internal Episode Code is for a closed episode of care that is older than one calendar year
- Required fields are missing
- Date fields are not formatted correctly
- Non-required fields require an empty field place holder (, ,)
- Number of fields does not equal what is anticipated for an Encounter Record (10, 11 or 12)
- Service date is prior to the start of the episode or after the end of the episode of care indicated
- Procedure Code supplied is not recognized

In the event that a service is supplied with an Internal Service ID that already exists, the current existing service record in the system will be updated (overwritten) with the new data supplied.

2.7 Edit Encounter Import Layout

Field #	Field Name	Data Type	Length	Comments/Description	Required
1	Record Identifier	Character	1	This flag determines data contained within the remainder of the row and how the row should be formed. **Value = "U"**	Yes

Conditions for which NOMS import record generates an error:

- No consumer is found with the corresponding Internal ID
- No episode is found with the specified Internal Episode Code
- The Internal Episode Code is for a closed episode of care that is older than one calendar year
- Required fields are missing
- Date fields are not formatted correctly
- Number of fields does not equal what is anticipated for a NOMS History Record (34)

- Non-required fields require an empty field place holder (, ,)
- NOMS History date is prior to the start of the episode or after the end of the episode of care indicated
- This NOMS History Record is assigned to either an Initial or Discharge NOMS Reason when one already exists for the episode of care indicated for this consumer.

3. Import Log

The Import log functionality allows you to view current or historical import log results. The top of the Import log results grid displays the import summary which includes the date and time the import was processed, the name of the user that performed the import, the imported file name and records count.

By selecting the "Detail" button located on the left of each import log row, more detail information is displayed. The detail results grid shows each record processed from the file. Information displayed in the detail includes the date & time the record was processed, the record number (row number in the file), the transaction type (Insert, Update, Validate, Delete, etc), the reference message or code, the message ID (see Section 4 – DARMHA Message Codes) and the status of the transaction (OK or Error). The detail grid can be filtered to display all the records, the OK records (success) or Error records (fail).

Import Errors Troubleshooting

The goal of the following sections is to provide a description of some of the information provided for each record processed using the import functionality. If after reviewing these items the user still can't identify the cause of an error, the user should contact the DARMHA Helpdesk (**darmha@fssa.in.gov**) for further assistance.

Message ID

The Message ID column of the Import Log Detail grid report displays the resulted DARMHA Message Code number for the processed transaction (record). A complete list of all the DARMHA Message Codes and their descriptions are available Section 4 at the end of the document.

Reference ID

The Reference ID column of the Import Log Detail grid report provides further information for the processed transaction (record). The reference ID may contain one of the following values:
- DARMHA Message Code
- Binary (0 or 1) string representing the status of each field (0 = ok or 1 = error)
- Text message
- Reference value (Internal ID, Episode ID, Date, etc)

Binary String (0100000…)

The binary string found in some Reference ID records represents the status of each field for the record layout being imported. For example, an error on the Date of Birth while inserting or updating a consumer record will display an error on the position # 6 (00000100000000000).

4. DARMHA Error Message Codes
